# AUTO DISPENSE REFERENCE SHEET

## OPERATION

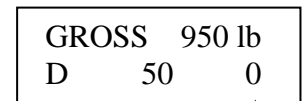

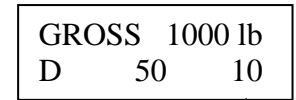

CURRENT DISPLAY:

1. To start **DISPENSING**, press

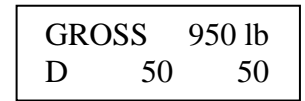

- Auger will **STOP AUTOMATICALLY** when the amount left to be dispensed is equal to the **PREACT WEIGHT** value. (ex. Auger Stops with 10 lbs left to dispense due to preact weight being set at 10 lbs)
- Amount left to be dispensed will continue to decrease until seed stops flowing down the spout.

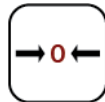

2. To **REPEAT** with same dispense weight, press

- To change dispense weight press

3. To **EXIT** Auto Dispense Mode, press

Standard weight display will return to the remote.

## ADJUSTING PREACT WEIGHT

This setting compensates for the seed that is still exiting the telescoping spout after the auger has stopped. Adjusting the **PREACT WEIGHT** per each seed type, weight, etc. insures accuracy and repeatability of desired dispense weight in each hopper. If the **PREACT** is not adjusted the system will continue to over or under load the hoppers.

Incorrect Dispense Amount	Solution	Gross Dispensed - Preset = Change in PREACT Value
Amount Dispensed is <b>LARGER</b> than Amount Preset	Increase PREACT WGT	Preset: 50 lbs, Gross Disp.: 55 lbs, PREACT: 10 lbs 55lbs – 50lbs = 5lbs Increase PREACT to 15lbs
Amount Dispensed is <b>SMALLER</b> than Amount Preset	Decrease PREACT WGT	Preset: 50 lbs, Gross Disp.: 45 lbs, PREACT: 10 lbs 45lbs – 50lbs = -5lbs Increase PREACT to 10lbs
